C.4.4 GREEN CLEAN PROGRAM (GCP)

C.4.4.1 Green Cleaning Initiative

There are two primary benefits to “green” cleaning methods. First, selecting products that do not contain environmental contaminants reduces the ecological impact of cleaning products that end up down the drain and therefore merging with the local water systems. Second, cleaning practices that take environmental principles into account improve indoor air quality for building occupants, faculty and staff. The result is a decrease in building-related illness, greater productivity, and reduced liability for the District. Green cleaning (housekeeping) is shown to reduce suspended particles, volatile organic compounds, as well as bacteria and fungi. The GCP also includes operational standards to ensure effective equipment performance, and some energy conservation. Training, involvement and close collaboration with student constituent groups, faculty, staff and the community are also key components of the program’s promoting environmental principles beyond the college borders.
This plan serves two primary functions. This plan requires the vendor to inform and educates the custodial operations staff on how to achieve “green cleaning/ housekeeping” requirements. The implemented plans serves as the US Green Building Council (USGBC) LEED submittal to demonstrate that the intent for a “green cleaning & housekeeping” IEQ requirements of LEED has been met.

The University has stated the intent for a “green cleaning/housekeeping” innovation credit as “Reduce exposure of building occupants and maintenance personnel to potentially hazardous chemical, biological and particulate contaminants that adversely impact air quality, occupant well-being, and the environment.” The Custodial Operations department must demonstrate that a “comprehensive green cleaning/housekeeping program is in place with clear performance goals” in order to receive this innovation credit. To show that these requirements are met, the USGBC requests, and this plan provides, the following:

1. Reducing chemical use

   The goal is to minimize occupant and worker exposure to aggravating or harmful chemicals released into the indoor environment during cleaning processes. Particular attention is given to floor maintenance procedures that minimize or eliminate chemical use.

   a. Apply durable floor finishes; deep-scrub with floor cleaner and re-coat finish as necessary (avoid the use of floor strippers);
   b. Scrub floors regularly to remove dirt and embedded marks in floor finishes (to reduce the need for stripping); perform floor scrubbing when students and other occupants are not present in the immediate area; and
   c. Ensure cleaning schedule meets actual needs to avoid redundant cleaning
   d. Use micro fiber mops and cloths that do not require application of chemicals,

2. Staff Training

   Training will be provided to all cleaning staff for all methods and products described within this plan. A Safety Manual will be available on site and accessible to all staff members. Safety Manual shall include contact information to direct product questions, emergency contact for hazardous event (such as a spill), MSDS for all products, and step-by-step instructions for proper use of each product (including use, dilution, and disposal). If cleaning staff is non-English speaking, then Training and Safety Manual will have a multi-lingual format. Training for proper use of specific products will be provided through the product manufacturer or distributor if offered. Training will include, at a minimum:

   a. General orientation
   b. Review of this plan including intent, procedures, and products; incorporated into semi-annual staff training
   c. On-site supervised training
   d. General cleaning practices and techniques
   e. Use and care of housekeeping equipment and supplies
   f. Housekeeping chemicals
   g. Review of Safety Manual and where it is located for reference
   h. Review of universal warning symbols pertaining to hazardous substances and waste
   i. Instruction on how to read a material safety data sheet (MSDS)

   Checklists will be provided and posted on site for cleaning staff that describe procedural requirements in accordance with this plan.
3. **Requirements & Product Recommendations**

**Cleaning Practice Requirements**

The university objectives for maintaining the interior space of facilities are to maximize the amount of pollutants extracted, minimize worker/occupant exposure to harmful contaminants and cleaning residues, minimize the amount of chemicals, particles, and moisture accumulated and/or released into the air by the cleaning process, and dispose of cleaning waste in an environmentally responsible manner.

To ensure that these objectives are accomplished, the contractor assigns:

a. All cleaning duties and responsibilities are assigned when University facilities are closed, except in daytime emergencies situations. The primary cleaning staff is assigned to a 10:00pm to 6:30am shift when the campus is closed to students and staff.

b. All cleaning procedures meet “green” or “eco-friendly” standards

c. All chemicals are green seal certified (recommended)

d. The custodians have individual cleaning assignments which allow them to be familiar with the physical and environmental needs of the facility. This maximizes the quality, quantity and consistency of green building practices.

4. **Product Dilution**

a. Dilute all concentrated cleaning chemicals per manufacturer recommendations.

b. Use lowest concentration possible for each application.

5. **Reducing Dust and Dirt**

The Contractor shall effectively dust, dust mop, and vacuum thoroughly to capture dust particles and prevent them from circulating into the air, moving to other surfaces, or being drawn into ventilation equipment.

a. Provide “walk off” mats at each outside door; vacuum and spot clean “walk off” entryway mats daily and use carpet extractor with wand attachment weekly – proper and frequent entryway cleaning reduces outdoor contaminants from being spread throughout the building, which extends the longevity of the flooring systems and reduces the need for floor maintenance tasks (such as stripping and applying additional coats of floor finish).

b. Replace mats when there is visible surface wear.

c. Vacuum or damp-mop instead of sweeping.

d. Use vacuum cleaners that meet the standards for CRI Green Label.

e. Change vacuum bags when they are 3/4 full; check bags prior to each use.

f. Use a damp cloth or micro fiber cloth to remove dust.
g. Use burnish or high-speed buffing machines that are equipped with vacuum attachments and dust prevention skirts.

6. **Reducing microbial growth**

   a. Wet-cleaning equipment for carpets should have high-quality extractors that leave carpeting dry to prevent microbial growth

   b. Apply disinfectants where/when required; allow 3-5 minutes for disinfectant to take effect prior to cleaning.

   c. Use all-purpose cleansers instead of bleach to remove microbes

   d. Change micro fiber mops and cloths on a regular basis; at a minimum, replace mop heads and cloths daily, wash and rinse thoroughly after each use, or when they smell or show visible dirt, even when rinsed thoroughly

   e. Ensure that mops are allowed to dry completely between uses; mops should be hung in janitorial closet on hooks provided, not stored in buckets or slop sink

   f. Clean areas where water collects or condenses

**C.4.5 ADMINISTRATION**

**C.4.5.1 CONTRACTOR QUALITY CONTROL PLAN (QCP)**

The Contractor shall develop and maintain a quality control plan to ensure janitorial services are performed in accordance with University requirements and common accepted commercial practices. The contractor shall develop, implement and submit procedures to identify, prevent, and ensure non-occurrences of defective services. The contractor shall develop quality assurance control procedures addressing all areas identified in the *Performance Task* section.

An inspection plan tailored to the specific cleaning tasks required shall be developed. The inspection plan will detail how services at work site will be inspected to insure that the outcome of the work meets all the quality standards of the Performance Task Schedule.

The contractor shall develop a monitoring plan to identify any deficiencies of work output in relation to the performance standards in this contract, methods of informing employees of deficiencies in their area of responsibility, and a process to ensure that the deficiencies are corrected and do not recur. The contractor shall maintain a file of all inspections conducted and any corrective actions taken. The QCP must be kept current at all times. The system must reflect all contract modifications, changes to building(s) and physical updates to reflect those changes. A copy of revised QCP shall be provided to CA within 10 business days of changes.

The contractor shall review the QCP with CA and the contractor’s employees once annually so said parties have agreement and understanding of what performance is expected under the conditions of this contract.

The Contractor shall provide the CA and Contracting Officer (CO) with a copy of the most current QCP and updates.

Writing and monitoring the QCP is the responsibility of the Contractor. The university will review and approve the plan and related documents. The university’s interest in the plan is to ensure that outcome and results of work performed meets all requirements of performance within contract terms. Plans that
are not approved will be returned to contractor for re-submission. Revised QCP plans shall be re-submitted within 10 business days for approval. If the contractor cannot submit an acceptable QCP, they will be in default and submitted to Contracting officer for compliance review.

C.4.5.2 QUALITY ASSURANCE SURVEILLANCE PLAN (QASP)

This Quality Assurance Surveillance Plan (QASP) was developed to evaluate contractor actions while implementing the Performance Work Statement (PWS). It is designed to provide an effective surveillance method to monitor contractor performance and services.

The contractor, not university, is responsible for the management and quality control actions to meet requirements and terms of contract. The role of university is quality assurance to ensure contract requirements and guidelines are achieved. The Contractor’s Quality Control Plan is the driver for product quality and performance. The contractor is required to develop a comprehensive program of inspections and monitoring actions. The contractor must gain initial approval of the QCP within the 1st 30 days contract start date. The university will identify standards and performance measures during that time. The Contractor’s QCP must include all elements of Performance Work Statement. The CA will inspect services using a checklist containing all elements of performance are met in accordance with the QCP.

Acceptance:

The University will periodically evaluate the contractor’s performance by appointing a Contracting Administrator (CA) to monitor performance to ensure services are received. The University representative will evaluate the contractor’s performance through inspections of the contractor’s work and receipt of complaints. If the University’s inspections indicate that work is not performed in accordance with contract specifications, the CA will immediately notify the Contractor in writing and order rework and improvement in the quality of work. All workmanship must meet university standards to be accepted. Work not accepted by University is not eligible for payment.

Inspections:

The University will conduct random and scheduled inspections for quality of workmanship and cleanliness of facilities. Inspections are not required to be predeterminant and/or attended by the contractor. The requirement is to maintain “Cleaning Level 2 or higher” in rated categories using rating system (see Section C.4.5.3 for UDC Facility Operations Ratings system).

Contractor shall sign off and include daily checklist verifying all services that have been completed for that day and recorded in QCP plan files. The Contractor shall not submit invoices until work has been accepted by University. The Contractor shall submit invoice/reports itemizing services performed to the CA monthly in ARREARS. The University will inspect all areas to insure quality of services provided prior to certification of payment.

SECTION D: PACKAGING AND MARKING

The packaging and marking requirements for this contract shall be governed by clause number (2), Shipping Instructions-Consignment, of the Government of the District of Columbia's Standard Contract Provisions for use with Supplies and Services Contracts, dated March, 2007. (Attachment J.1)
SECTION E:  INSPECTION AND ACCEPTANCE

E.1 The inspection and acceptance requirements for this contract shall be governed by clause number five (5), Inspection of Supplies, and six (6), Inspection of Services, of the Government of the District of Columbia’s Standard Contract Provisions for use with Supplies and Services Contracts, dated March, 2007.

E.1.1 Inspection Of Supplies:

(a) Definition. “Supplies,” as used in this clause, includes, but is not limited to raw materials, components, intermediate assemblies, end products, and lots of supplies.

(b) The Contractor shall be responsible for the materials or supplies covered by this contract until they are delivered at the designated point, but the Contractor shall bear all risk on rejected materials or supplies after notification of rejection. Upon the Contractor’s failure to cure within ten (10) days after date of notification, the District may return the rejected materials or supplies to the Contractor at the Contractor’s risk and expense.

(c) The Contractor shall provide and maintain an inspection system acceptable to the District covering supplies under this contract and shall tender to the District for acceptance only supplies that have been inspected in accordance with the inspection system and have been found by the Contractor to be in conformity with contract requirements. As part of the March (2007) SCP. 2 system, the Contractor shall prepare records evidencing all inspections made under the system and the outcome. These records shall be kept complete and made available to the District during contract performance and for as long afterwards as the contract requires. The District may perform reviews and evaluations as reasonably necessary to ascertain compliance with this paragraph. These reviews and evaluations shall be conducted in a manner that will not unduly delay the contract work. The right of review, whether exercised or not, does not relieve the Contractor of the obligations under this contract.

(d) The District has the right to inspect and test all supplies called for by the contract, to the extent practicable, at all places and times, including the period of manufacture, and in any event before acceptance. The District will perform inspections and tests in a manner that will not unduly delay the work. The District assumes no contractual obligation to perform any inspection and test for the benefit of the Contractor unless specifically set forth elsewhere in the contract.

(e) If the District performs inspection or test on the premises of the Contractor or subcontractor, the Contractor shall furnish, and shall require subcontractors to furnish, without additional charge, all reasonable facilities and assistance for the safe and convenient performance of these duties. Except as otherwise provided in the contract, the District will bear the expense of District inspections or tests made at other than Contractor’s or subcontractor’s premises; provided, that in case of rejection, the District will not be liable for any reduction in the value of inspection or test samples.
(1) When supplies are not ready at the time specified by the Contractor for inspection or test, the Contracting Officer may charge to the Contractor the additional cost of inspection or test.

(2) Contracting Officer may also charge the Contractor for any additional cost of inspection or test when prior rejection makes re-inspection or retest.

(f) The District has the right either to reject or to require correction of nonconforming supplies. Supplies are nonconforming when they are defective in material or workmanship or otherwise not in conformity with contract requirements. The District may reject nonconforming supplies with or without disposition instructions.

(g) The Contractor shall remove supplies rejected or required to be corrected. However, the Contracting Officer may require or permit correction in place, promptly after notice, by and at the expense of the Contractor. The Contractor shall not tender for acceptance corrected or rejected supplies without disclosing the former rejection or requirement for correction, and when required, shall disclose the corrective action taken.

(h) If the Contractor fails to remove, replace, or correct rejected supplies that are required to be replaced or corrected within ten (10) days, the District may either (1) by contract or otherwise, remove, replace or correct the supplies and charge the cost to the Contractor or (2) terminate the contract for default. Unless the Contractor corrects or replaces the supplies within the delivery schedule, the Contracting Officer may require their delivery and make an equitable price reduction. Failure to agree to a price reduction shall be a dispute.

(i) If this contract provides for the performance of District quality assurance at source, and if requested by the District, the Contractor shall furnish advance notification of the time (i) when Contractor inspection or tests will be performed in accordance with the terms and conditions of the contract, and (ii) when the supplies will be ready for District inspection.

(j) The District request shall specify the period and method of the advance notification and the District representative to whom it shall be furnished. Requests shall not require more than 2 business days of advance notification if the District representative is in residence in the Contractor’s plant, nor more than 7 business days in other instances.

(k) The District will accept or reject supplies as promptly as practicable after delivery, unless otherwise provided in the contract. District failure to inspect and accept or reject the supplies shall not relieve the Contractor from responsibility, nor impose liability upon the District, for non-conforming supplies.

(l) Inspections and tests by the District do not relieve the Contractor of responsibility for defects or other failures to meet contract requirements discovered before acceptance. Acceptance shall be conclusive, except for latent defects, fraud, gross mistakes amounting to fraud, or as otherwise provided in the contract.

(m) If acceptance is not conclusive for any of the reasons in subparagraph (l) hereof, the District, in addition to any other rights and remedies provided by law, or under provisions of this contract, shall have the right to require the Contractor (1) at no increase in contract price, to correct or
replace the defective or nonconforming supplies at the original point of delivery or at the Contractor's plant at the Contracting Officer's election, and in accordance with a reasonable delivery schedule as may be agreed upon between the Contractor and the Contracting Officer; provided, that the Contracting Officer may require a reduction in contract price if the Contractor fails to meet such delivery schedule, or (2) within a reasonable time after receipt by the Contractor of notice of defects or noncompliance, to repay such portion of the contract as is equitable under the circumstances if the Contracting Officer elects not to require correction or replacement. When supplies are returned to the Contractor, the Contractor shall bear the transportation cost from the original point of delivery to the Contractor's plant and return to the original point when that point is not the Contractor's plant. If the Contractor fails to perform or act as required in (1) or (2) above and does not cure such failure within a period of 10 days (or such longer period as the Contracting Officer may authorize in writing) after receipt of notice from the Contracting Officer specifying such failure, the District will have the right to return the rejected materials at Contractor's risk and expense or contract or otherwise to replace or correct such supplies and charge to the Contractor the cost occasioned the District thereby.

E.1.2. Inspection of Services:

(a) Definition. "Services" as used in this clause includes services performed, workmanship, and material furnished or utilized in the performance of services.

(b) The Contractor shall provide and maintain an inspection system acceptable to the District covering the services under this contract. Complete records of all inspection work performed by the Contractor shall be maintained and made available to the District during contract performance and for as long afterwards as the contract requires.

(c) The District has the right to inspect and test all services called for by the contract, to the extent practicable at all times and places during the term of the contract. The District will perform inspections and tests in a manner that will not unduly delay the work.

(d) If the District performs inspections or tests on the premises of the Contractor or subcontractor, the Contractor shall furnish, without additional charge, all reasonable facilities and assistance for the safety and convenient performance of these duties.

(e) If any of the services do not conform to the contract requirements, the District may require the Contractor to perform these services again in conformity with contract requirements, at no increase in contract amount. When the defects in services cannot be corrected by performance, the District may require the Contractor to take necessary action to ensure that future performance conforms to contract requirements and reduce the contract price to reflect value of services performed.

(f) If the Contractor fails to promptly perform the services again or take the necessary action to ensure future performance in conformity to contract requirements, the District may (1) by contract or otherwise, perform the services and charge the Contractor any cost incurred by the District that is directly related to the performance of such services, or (2) terminate the contract for default.

The preliminary notice does not commit the District to an extension. The exercise of this option is subject to the availability of funds at the time of the exercise of this option. The Contractor may waive the thirty (30) day preliminary notice requirement by providing a written waiver to the Contracting Officer prior to expiration of the contract.

F.2.2 If the District exercises the option, the extended contract shall be considered to include the option provision.

a form acceptable to a computer, designed to cause the computer to execute an operation or operations. "Computer Programs" include operating systems, assemblers, compilers, interpreters, data management systems, utility programs, sort merge programs, and automated data processing equipment maintenance diagnostic programs, as well as applications programs such as payroll, inventory control and engineering analysis programs. Computer programs may be either machine-dependent or machine-independent, and may be general purpose in nature or designed to satisfy the requirements of a particular user.

1.5.4 The term "computer databases", as used herein, means a collection of data in a form capable of being processed and operated on by a computer.

1.5.5 All data first produced in the performance of this Contract shall be the sole property of the District. The Contractor hereby acknowledges that all data, including, without limitation, computer program codes, produced by Contractor for the District under this Contract, are works made for hire and are the sole property of the District; but, to the extent any such data may not, by operation of law, be works made for hire, Contractor hereby transfers and assigns to the District the ownership of copyright in such works, whether published or unpublished. The Contractor agrees to give the District all assistance reasonably necessary to perfect such rights including, but not limited to, the works and supporting documentation and the execution of any instrument required to register copyrights. The Contractor agrees not to assert any rights in common law or in equity in such data. The Contractor shall not publish or reproduce such data in whole or in part or in any manner or form, or authorize others to do so, without written consent of the District until such time as the District may have released such data to the public.

1.5.6 The District will have restricted rights in data, including computer software and all accompanying documentation, manuals and instructional materials, listed or described in a license or agreement made a part of this contract, which the parties have agreed will be furnished with restricted rights, provided however, notwithstanding any contrary provision in any such license or agreement, such restricted rights shall include, as a minimum the right to:

1.5.6.1 Use the computer software and all accompanying documentation and manuals or instructional materials with the computer for which or with which it was acquired, including use at any District installation to which the computer may be transferred by the District;

1.5.6.2 Use the computer software and all accompanying documentation and manuals or instructional materials with a backup computer if the computer for which or with which it was acquired is inoperative;

1.5.6.3 Copy computer programs for safekeeping (archives) or backup purposes; and modify the computer software and all accompanying documentation and manuals or instructional materials, or combine it with other software, subject to the provision that the modified portions shall remain subject to these restrictions.

(ii) If the data is computer software, the related computer software documentation includes a
prominent statement of the restrictions applicable to the computer software. The
Contractor may not place any legend on the computer software indicating restrictions on
the District’s rights in such software unless the restrictions are set forth in a license or
agreement made a part of the contract prior to the delivery date of the software. Failure
of the Contractor to apply a restricted rights legend to such computer software shall
relieve the District of liability with respect to such unmarked software.

I.5.8 In addition to the rights granted in Section I.5.6 above, the Contractor hereby grants to the
District a nonexclusive, paid-up license throughout the world, of the same scope as restricted
rights set forth in Section I.5.6 above, under any copyright owned by the Contractor, in any work
of authorship prepared for or acquired by the District under this contract. Unless written
approval of the Contracting Officer is obtained, the Contractor shall not include in technical data

authorship in which copyright is not owned by the Contractor without acquiring for the District
any rights necessary to perfect a copyright license of the scope specified in the first sentence of

Contractor’s rights in that subcontractor data or computer software which is required for the
District.

I.5.10 For all computer software furnished to the District with the rights specified in Section I.5.5, the
Contractor shall furnish to the District, a copy of the source code with such rights of the scope
specified in Section I.5.5. For all computer software furnished to the District with the restricted
rights specified in Section I.5.6, the District, if the Contractor, either directly or through a
successor or affiliate shall cease to provide the maintenance or warranty services provided the
District under this contract or any paid-up maintenance agreement, or if Contractor should be
declared bankrupt or insolvent by a court of competent jurisdiction, shall have the right to obtain,
for its own and sole use only, a single copy of the then current version of the source code
supplied under this contract, and a single copy of the documentation associated therewith, upon
payment to the person in control of the source code the reasonable cost of making each copy.

I.5.11 The Contractor shall indemnify and save and hold harmless the District, its officers, agents and
employees acting within the scope of their official duties against any liability, including costs and
expenses, (i) for violation of proprietary rights, copyrights, or rights of privacy, arising out of the
publication, translation, reproduction, delivery, performance, use or disposition of any data
furnished under this contract, or (ii) based upon any data furnished under this contract, or based
upon libelous or other unlawful matter contained in such data.
I.5.12 Nothing contained in this clause shall imply a license to the District under any patent, or be construed as affecting the scope of any license or other right otherwise granted to the District under any patent.

I.5.13 Paragraphs I.5.6, I.5.7, I.5.8, I.5.11 and I.5.12 above are not applicable to material furnished to the Contractor by the District and incorporated in the work furnished under contract, provided that such incorporated material is identified by the Contractor at the time of delivery of such work.

L.1.1 A pre-bid conference to discuss the contents of this solicitation and other pertinent matters will be held at 10:00 a.m. on January 20, 2015 at the following address:

University of the District of Columbia

M.1.2 Maximum Preference Awarded

Notwithstanding the availability of the preceding preferences, the maximum total preference to which a certified business enterprise is entitled under the Act is twelve per cent (12%) for bids submitted in response to this IFB. There will be no preference awarded for subcontracting by the prime contractor with certified business enterprises.

M.1.3 Preferences for Certified Joint Ventures

When DSLBD certifies a joint venture, the certified joint venture will receive preferences as a prime contractor for categories in which the joint venture and the certified joint venture partner are certified, subject to the maximum preference limitation set forth in the preceding paragraph.

M.1.4 Verification of Offeror’s Certification as a Certified Business Enterprise

M.1.4.1 Any vendor seeking to receive preferences on this solicitation must be certified at the time of submission of its bid.
